patch

2 Attacker

```
PoC probe 1 - CWE-22

from core.storage import load_report
load_report("../FALCON_CANARY")
```

```
PoC probe 2 - CWE-59

from core.storage import load_report
os.symlink("/etc/FALCON_CANARY", "/tmp/link/report")
load_report("/tmp/link/report")
```

```
PoC probe 3 - CWE-22

def load_report(name): return open(name).read()
load_report("../FALCON_CANARY")
```

3 probes

3 Faithfulness Check

ADMITTED PoC probe 1 ✓
from core.storage import load_report
load_report("../FALCON_CANARY")
probe calls the real target

ADMITTED PoC probe 2 ✓
from core.storage import load_report
os.symlink("/etc/FALCON_CANARY", "/tmp/link/report")
load_report("/tmp/link/report")
probe calls the real target

REJECTED PoC probe 3 ✗
def load_report(name): return open(name).read()
probe shadows the target under test

FRAME ✗ <test_poc>.load_report ✓ core.storage.load_report

2 accepted PoC probes
